Earthquake 5.2 Magnitude, San Diego County, 14 miles NNW of Borrego Springs

On 06/10/16 at 0104 hours, a verified Magnitude 5.2 earthquake occurred 14 miles NNW of Borrego Springs in San Diego County. There are (no) reports of damage or injuries from San Diego County or surrounding Operational Areas.

- Per ENTAC and Caltrans no damage to roads or bridges reported, roads are open.
- Multiple aftershocks have occurred and are still occurring.

Per the CISN Southern California Duty Officer, Egil Hauksen:

- The earthquake was near Anza Borrego State Park and on the San Jacinto fault. This was the site of a M5.4 quake in 1980, and there have been several quakes at the M5 level in the past decade along this fault. There have been several aftershocks including two at M3.5, one at M3.3 and one at M3.

Pony, Vegetation Fire, Siskiyou County

Location: Klamath National Forest, Happy Camp

Jurisdiction: Federal DPA, FRA

Start Date / Time of Event: 06/07/16 at 1109 hours

Per Cal OES Fire Duty Officer and CAL FIRE as of 06/09/16 at 1731 hours:

- 700 Acres, 0% Contained
- Fire behavior remains active in brush and timber with uphill runs.
- Burning in fire scars from 2001, 2008 and 2009.
- Type 2 IMT Young.

Coleman, Vegetation Fire, Monterey County

Location: Fort Hunter Liggett, Monterey County

Jurisdiction: FRA/SRA, Unified Command Cal Fire and USFS

Start Date / Time of Event: 06/04/2016 at 1451 hours

Per Cal OES Fire Duty Officer and CAL FIRE [as of 06/10/16 at 0555 hours](#):

- 2,520 Acres, 92% Contained
- Type 1 IMT McGowan
- Demobilization due to reduced fire threat and progress of direct line construction.
- Expected containment 06/18/2016

Cal OES Resources

Resource status validated as of 06/09/16:

- 2 OES Fire and Rescue Assistant Chiefs have been released today, 06/09/16.
- 1 OES OASIS Satellite Communications Unit will demobilize on 06/10/16.
- 2 Public Safety Communication Technicians

WEATHER OF CONCERN

Weather of Concern

- The threat of thunderstorms will increase this weekend over the Sierra with the best chance occurring Sunday afternoon and evening. Isolated thunderstorms are also possible in the Kern County mountains Sunday afternoon and evening.
- A Fire Weather Watch is in effect for portions of Northern California beginning late tonight through Saturday evening.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

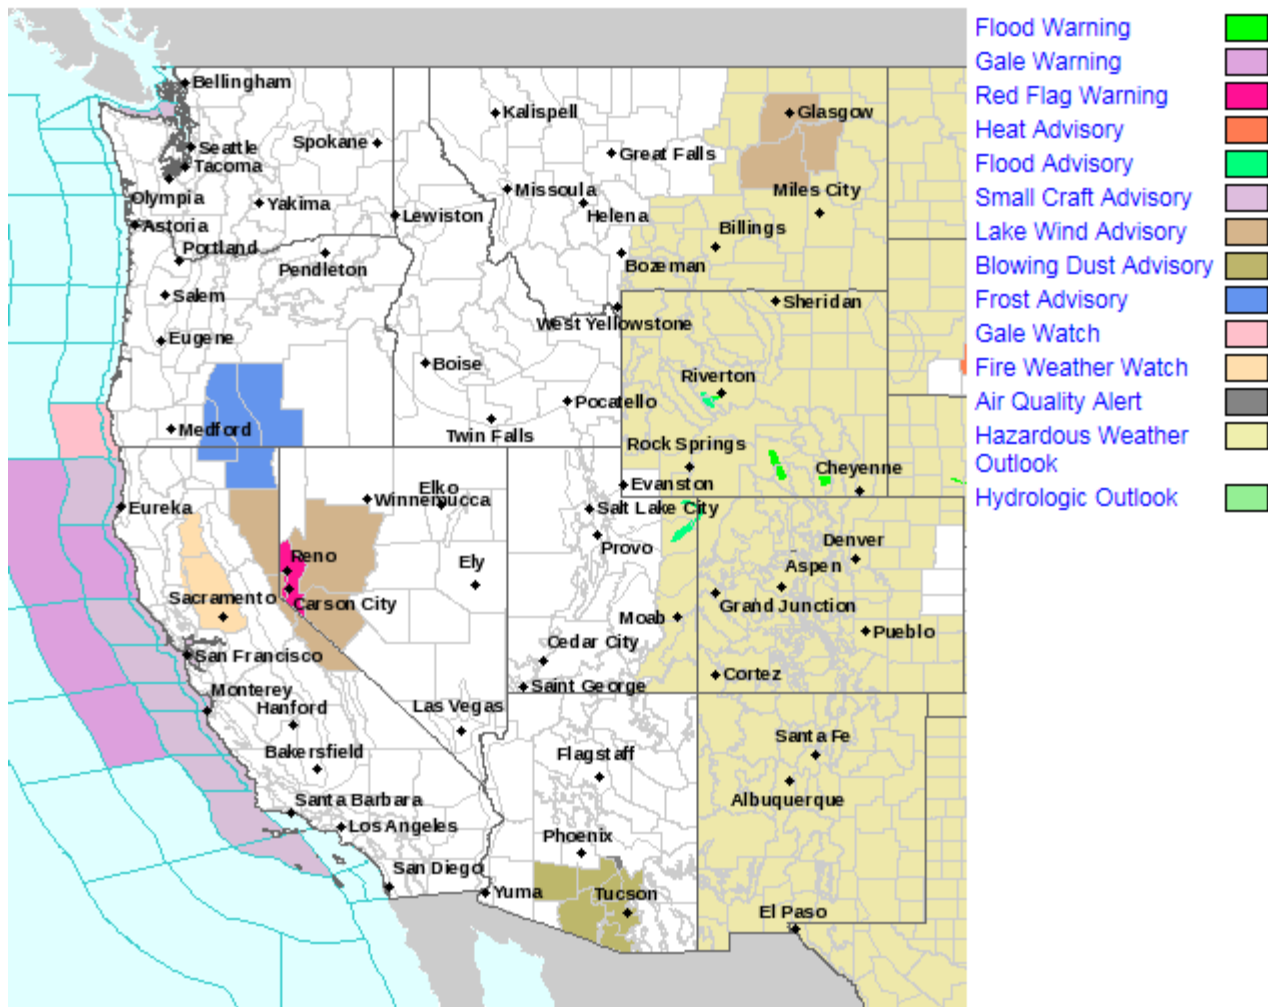

NORTHERN CALIFORNIA

A low pressure trough just off the West Coast continues to rule our weather pattern and will be lingering over the region through Saturday. Some light showers are expected in the far northern areas near the Oregon border today, but wetting rain (0.10 inch) will be hard to come by even for areas that have several precipitation events. There is a small chance of isolated afternoon/evening mountain thunderstorms in the north today. Relative Humidity (RH) will be higher overnight in all areas than recently. Higher pressure will start to move into the region later Saturday, and warmer, drier conditions will be in place Sunday. At the same time, a weak low will be moving across Southern California, and enough moisture will wrap around it to bring a slight chance of some showers or isolated thunderstorms to the Tahoe area Saturday and Sunday. Another low pressure trough will drop south from the Gulf of Alaska early next week for a close repeat of the weather expected into this weekend, although it will probably be warmer. The warmest inland areas will be in the 80s for much of the 7 day period, but likely reaching into the low and mid 90s Sunday and Monday. Gusty south to northwest afternoon winds will be in place today and Friday, then winds will become more northerly Friday night into Sunday. The strongest afternoon winds will be westerly in our eastern areas in particular and that will help foster low afternoon RH (10-15%) there. Wind gusts of 30-35 mph will be widespread with some areas gusting to around 45 mph. Winds will be strongest this afternoon. Gusty afternoon winds will return early next week as well.

SOUTHERN CALIFORNIA

An unseasonably deep trough over the Pacific Northwest will bring cooler and more humid weather to the region through the weekend. The north winds forecast for Santa Barbara County have failed to materialize and expect just a few areas near San Marco Pass to see light north winds through noon. Onshore flow along with some high clouds will collude to slice off 5-8 degrees from yesterday's temperature readings. Expect high temperatures today to be in the 60's to lower 70's near the coast, mid to upper 80's in the valleys to 95 in the desert. The San Joaquin Valley and surrounding foothills will reach the lower to mid 90's. Expect lighter winds in these areas the rest of the weekend. A steady dose of onshore flow today through the weekend should allow temperatures to continue to drop 3-5 degrees each day. By Sunday, temperatures will be a few degrees below normal. Widespread night through morning marine layer coverage should occur, particularly over Southern California. Some patchy drizzle may occur near the higher terrain and the marine layer may become deep enough to extend well into the Cajon Pass. West winds of 15-25 mph with gusts to 35 mph can be expected each afternoon through the weekend in the Kern County Mountains, Antelope Valley, Banning Pass and the eastern side of the Cleveland National Forest. A bit of instability may lead to some cumulus buildups along the Sierra Crest and higher peaks of Death Valley N.P. Saturday and Sunday. Temperatures should climb a few degrees early next week as high pressure builds over the Four Corners region. No significant precipitation is expected during the next 7-10 days.
